

Public Health Emergency Response Plan for the Community in the Event of a Public Health Emergency

The purpose of this plan is to ensure that the community is prepared to respond to a public health emergency.

This plan (the "Plan") describes the roles and responsibilities of the community in the event of a public health emergency.

The community is responsible for implementing the Plan, and for providing information and resources to support the response.

The Plan is based on the assumption that the community will act in a coordinated and timely manner to address the emergency. The Plan is intended to be a guide for the community, and it is not intended to be a substitute for professional judgment or advice.
