

Q: How do you see the role of the state in the future?
A: The role of the state is to provide a framework for the market to operate in. It should not be too large, but it should be strong enough to provide the necessary infrastructure and legal framework for the market to function properly. It should also be able to provide social safety nets for the vulnerable members of society.

Q: How do you see the role of the private sector in the future?
A: The private sector is the engine of economic growth. It should be encouraged to invest in research and development, to create jobs, and to provide the necessary goods and services for the population. The government should create a conducive environment for the private sector to operate in, by providing the necessary infrastructure, legal framework, and social safety nets.

Q: How do you see the role of the government in the future?
A: The government should continue to play a key role in the economy. It should be responsible for providing the necessary infrastructure, legal framework, and social safety nets for the market to function properly. It should also be responsible for providing the necessary services for the population, such as education, healthcare, and social security.

Q: How do you see the role of the market in the future?
A: The market is the mechanism through which resources are allocated. It should be allowed to function freely, with minimal government intervention. The market should be able to allocate resources efficiently, create jobs, and provide the necessary goods and services for the population.

Q: How do you see the role of technology in the future?
A: Technology is the key to economic growth. It should be encouraged to invest in research and development, to create jobs, and to provide the necessary goods and services for the population. The government should create a conducive environment for technology to flourish, by providing the necessary infrastructure, legal framework, and social safety nets.

Q: How do you see the role of education in the future?
A: Education is the foundation of economic growth. It should be encouraged to invest in research and development, to create jobs, and to provide the necessary goods and services for the population. The government should create a conducive environment for education to flourish, by providing the necessary infrastructure, legal framework, and social safety nets.

Q: How do you see the role of innovation in the future?
A: Innovation is the key to economic growth. It should be encouraged to invest in research and development, to create jobs, and to provide the necessary goods and services for the population. The government should create a conducive environment for innovation to flourish, by providing the necessary infrastructure, legal framework, and social safety nets.

Q: How do you see the role of entrepreneurship in the future?
A: Entrepreneurship is the engine of economic growth. It should be encouraged to invest in research and development, to create jobs, and to provide the necessary goods and services for the population. The government should create a conducive environment for entrepreneurship to flourish, by providing the necessary infrastructure, legal framework, and social safety nets.
