

INTERNATIONAL CONFERENCE ON MATHS IN TECHNOLOGY

INTERNATIONAL CONFERENCE ON MATHS IN TECHNOLOGY
The International Conference on Maths in Technology is a biennial event that brings together leading experts in the field of mathematics and its applications in technology. The conference provides a platform for researchers, engineers, and students to present their work, share ideas, and collaborate on new projects. The conference is organized by the International Association of Mathematical Engineers (IAMSE) and is held in a different location every two years. The conference is a key event in the calendar of the mathematical engineering community and is highly regarded for its quality and relevance. The conference covers a wide range of topics, including numerical methods, optimization, and the application of mathematics in various engineering disciplines. The conference is a valuable opportunity for participants to learn from the latest research and to establish new connections in the field.
